

Improving Access Services

Hot Hub – Patient Transport

Dear Colleagues,

We have been advised that there is now a service for patients to be transported to the Hot Site if they do not have their own transport.

This is operated by South Central Ambulance Service under the PTS banner.

Please complete the Hot Site Practice Triage template as usual and book into a Hot Site Telephone slot. Please indicate in the appointment slot that the patient does not have their own transport.

This service is not for patients who are housebound.

Thanks,

Simon
