

Increasing available shifts in PCR

Dear PCR GP Colleagues,

Given feedback regarding the general downturn in Locum requests as a result of the COVID pandemic and some feedback we are getting that existing shifts are getting increasingly busy, we have made the decision to run four 4.5hr shifts instead of the existing three 6hr shifts.

We hope by doing this that we provide more opportunities for working and that the shorter length will make the clinic more manageable.

The new shift times at the weekend will be:

- 08:00-12:30hrs
- 11:00-15:30hrs
- 12:30-17:00hrs
- 15:30-20:00hrs

New weekend rota in PCR

Start	Finish	Hours	Appointments
08:00	12:30	4.5	18
11:00	15:30	4.5	18
12:30	17:00	4.5	18
15:30	20:00	4.5	18
Total			72

The new rota will start on 1st August so will not affect your existing shifts.

Many thanks for your ongoing support of the service and we welcome your feedback on any changes and suggestions.

Many thanks

Simon
